Description:

The MS720 is a special purpose flow computer intended for use with Thermal Mass Flowmeters. The units of measure for flow rate and total can be entered by the user. An auxiliary, internal, high current, DC power supply is provided to power the Thermal Mass Flowmeters. Several DC power supply voltages are available.

The MS720 accepts analog input from Thermal Mass Flowmeter and provide linearization for the sensor and scaling to the flowrate and totalizer indicators. A variety of pulse output, analog outputs, control inputs, relay alarms, and RS232 outputs are provided standard. RS485 Modbus RTU is also an ordering option.

Enclosures are available suitable for panel, wall (Nema 4), benchtop, and explosion proof enclosure (Class 1 Div 1 Groups C+D) mounting schemes.
